Make your own Japanese Fan

Step 1. Gather your materials. You will need a paper plate, scissors, straws, coloured pens/ pencils and sticky tape.

Step 2. Cut the paper plate in half.

Step 3. Use the coloured pens and pencils to add decoration to your plate. We have chosen to draw some cherry blossom.

Step 4. Stick the straws to the back of the plate to create a handle for the fan. See picture.

Step 5. You have finished your fan. Don't forget to share what you have created with us **#SpikeDinosAdventures**
