When using the Loans Service:

DO:-

- Ensure all objects are handled with care, they are a finite collection.
- Please keep them in a secure place, especially overnight.
- Make one member of staff responsible for orders and sharing information contained within this agreement and other relevant information with colleagues
- Order objects early.
- Handle objects over a table, preferably over a soft surface – one object, two hands. (see further guidelines in the loans box)
- Read any packaging instructions carefully
- Wash hands before and after use.

DO NOT:-

Thank you for borrowing from us.

museumeducation@maidstone.gov.uk

Loans during the Covid-19 Pandemic

- When collecting and returning the box you will be asked to sign 2 copies of the loan document. It would be helpful if you bring your own pen to do this to reduce contamination between museum staff and yourself.
- Loans boxes should only be used by the booked 'bubble'. If it is being used by multiple 'bubbles' within a school items should be quarantined for at least 72 hours between uses.
- Boxes are quarantined at the museum between loans for 72 hours and are then cleaned with specialist cleaner. We allow at least one week between loans for this purpose. Please don't clean objects yourself.
- Adults and children should wash and dry their hands before and after handling the objects.
- The Learning Team should be contacted immediately should a Covid-19 outbreak occur in the school whilst the box is on site. In this case we would ask that the box is quarantined in school for 72 hours prior to it being returned to the museum. (time for this should be allowed within the loan period)
- This guidance will be updated in line with government guidelines.

Notes;

- By 'bubble' we mean the class groups, year group or department the school has grouped their students into.
- Quarantine is for 72 hours between return and clean.

Object Handling Guidelines — Teachers

Before attempting to pick up an object consider the following.....

How delicate is the object?

All museum objects are put at risk when being handled and therefore need to be treated delicately.

Can you tell how delicate the object is by sight?

It is often hard to tell by sight how delicate an object is. Always assume it is more fragile than it appears to be.

Are there any weak points?

Look for signs of cracking, historical repairs, unsafe joints, loose parts or delicate materials. Sometimes the most robust looking objects can disguise weak areas caused by decay or a bad repair that has since degraded.

Where am I going to move the object to...? Is your pathway clear?

If you are involved in moving objects around ALWAYS ensure that you have somewhere to place the object down. A seemingly lightweight object can soon become heavy if you find that your path is blocked or the area where you were going to place your object down is no longer free. Never attempt to lift an object above chest height, even light objects.

Where should I pick the object up from?

Having considered the above, you should now be ready to pick the object up. Hold the object close to your body at waist height using both hands to support its weight. (If an object is in parts, either transport it in a padded container, or carry each item separately .taking two trips.) If the object has a handle—do not use it!

Never attempt to lift an object that is too heavy for you, always ask for assistance.

Object Handling Guidelines — Pupils

Ensure your hands are clean before handling the objects.

Handle objects whilst sitting at a table or on the floor.

Only handle one object at a time.

Use two hands to hold the object.

Do not hold the object by the handles or parts that stick out, as these can easily break off.

Do not snatch objects from other people while they are handling them.

Do not walk around with objects.
