

Make your own Paper Plate Flower

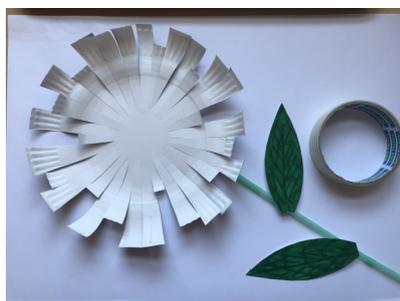

Step 1. Gather your materials. You will need a paper plate, card, scissors, straws, pencil, coloured pens/pencils and sticky tape.

Step 2. Cut into the centre of the plate. Do this all the way round. You can cut these at different lengths and use a pencil to curl them.

Step 3. Use the card to create two leaves, then colour them in. You can also colour your flower if you would like to.

Step 4. Place one of the straws into the other to create a stem. Then use the sticky tape to attach the flower head and leaves to it.

Step 5. You have finished your flower. Don't forget to share what you have created with us **#SpikeDinosAdventures**
