

Spike's Christmas Activity 8

#SpikeDinosAdventures

Welcome to a themed Spike Dino page for children (and adults)

Welcome to Spike's eighth Christmas info-activity page.

Spike has never played in real snow! He is hoping that over the Christmas holidays it might snow so he can build his first real snowman. Until then he has made friends with this friendly cuddly snowman!

He is also wondering if you have built a snowman and if you could share a picture with him.

He found out that the biggest snowwoman in the world was built in Maine, USA. Here are the facts he found out;

- * Called Olympia and took 1 month to build in Feb 2008.
- * Measured 37.21m tall
- * 5,896,700kg of snow was used to build her.
- * Eyelashes were made from eight pairs of skis
- * 14.6m wide fleece hat
- * 2.4m long nose made from chicken wire and painted cloth
- * Lips made from five red car tires
- * Arms made from two 9m tall spruce trees
- * 2m wide snowflake pendant
- * 40m long scarf
- * Three 1.5m wide truck tires as buttons

You can see a video of it being built here; [https://](https://www.guinnessworldrecords.com/world-records/tallest-snowman)

Activity; Make your own snowman mask - instructions on the next page.

Happy Christmas

Share your pictures tagging @MaidstoneMuseum and #SpikeDinosAdventures

Make your own Snowman

Step 1. Gather your materials. You will need a paper plate, coloured card (see pic), scissors, a pencil and some glue.

Step 2. Cut the centre out of the paper plate so you are left with a ring.

Step 3. Cut a top hat shape out of the black card, then use the other card to add some decoration.

Step 4. Glue the top hat onto the paper plate ring.

You have finished your snowman, don't forget to share what you have made with us #SpikeDinosAdventures
